EDUCATION

University of North Carolina at Chapel Hill – Chapel Hill, NC
Major in Computer Science; Minors in Astronomy and Data Science

August 2018 - May 2022

Honors and Awards

- SIEMENS Competition Semifinalist, National Merit Finalist, National AP Scholar, North Carolina Scholar Award

SKILLS

-
- **Full-stack Development:** Java, JavaScript, TypeScript, Python, C++, APIs, Test-driven development
 - **Cloud Services:** AWS (EC2, Lambda, RDS, S3, DynamoDB, etc...), Docker, Jenkins
 - **Data Science:** R, Python, MatLab, Apache Spark

EXPERIENCE

Software Engineer, *CapitalOne*

February 2023 - current

- Led initiative to standardize enterprise wide contribution models, increasing platform-consumer collaborations by 40% and decreasing consumer team onboarding time by 30%
- Refactored and optimized case management system business logic in the case management system, eliminating a long-standing defect and reducing manual developer toil by 15% through automation and cleaner code
- Implemented code-agnostic feature flagging mechanism, utilizing Java, AWS Lambda layers and Optimizely; scaled adoption across teams to achieve 60% faster release cycles with significantly fewer rollbacks and production incidents.
- Delivered a mission-critical full-stack capability in partnership with business stakeholders, implementing a new Rest API and leveraging Java and AWS services to retrieve and persist sensitive NAICS code data, resolving a complex compliance-driven business requirement
- Led a cloud resilience initiative by orchestrating failover and recovery of AWS S3, EC2, Lambda, RDS, CloudFormation, and Step Functions across environments; authored a runbook that accelerated recovery speed by 60% and strengthened disaster readiness.

Software Engineering Intern, *Ai4Govt*

January 2021 – August 2021

Ai4Govt builds data tools for government agencies, helping them manage complex information securely and efficiently

- Conducted end user interviews to identify critical pain points, architected solutions in Figma, and implemented new features using React, JavaScript, HTML, and CSS, directly improving usability and customer satisfaction.
- Partnered with executives, product managers, designers, business stakeholders, and end users to design and deliver a case management system for the City of Mobile's legal infrastructure, ensuring scalability, compliance, and operational efficiency
- Engineered and deployed a comprehensive frontend design system in Figma, refactoring the entire UI to align with the system and achieving significant improvements in user experience consistency, accessibility, and developer velocity
